STEM at Free 2 Teach

STEM lessons and kits that engage scientists from PreK through High School.

At Free 2 Teach we work to empower teachers so they can equip and inspire every student in our public schools. Our growing Free 2 Explore program puts high-impact lesson kits into the hands of teachers as the guide and grow our youngest scientists.

Free 2 Explore partners:

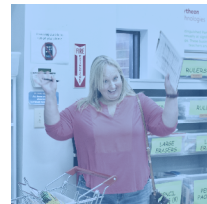

COLLINS AEROSPACE | PRATT & WHITNEY | RAYTHEON

Get Involved in STEM at Free 2 Teach!

1. Sponsor our kit programs: work with us to fund and create lessons for teachers to take back to their classrooms. Learn more at www.free2teach.org/free2explore.
2. Complete an off-site kit build: Download our Sunscreen Lesson Kit, assemble at your location and bring completed kits to our facility. Go to www.free2teach.org/kitbuilds for more information.
